The specific terms of the stock options issue are as follows:

The number of shares subject to new share acquisition rights shall be 196,000 of the Company's common shares, of which new share acquisition rights covering of 67,000 shares shall be allocated to the Company's Directors.

If the Company conducts a stock split or reverse stock split, the number of shares shall be adjusted using the following calculation formula. This adjustment, however, shall only be conducted for the number of shares subject to the new share acquisition rights that have not been exercised at that time. Fractional shares resulting from the adjustment shall be rounded down.

NUMBER OF SHARES AFTER ADJUSTMENT =

NUMBER OF SHARES BEFORE ADJUSTMENT × SPLIT OR REVERSE SPLIT RATIO

**5. The need for payment in consideration of New Share Acquisition Rights**

**6. Issue date of New Share Acquisition Rights**

**7. Persons to whom New Share Acquisition Rights may be allocated**

Directors, Executive Officers and Corporate Officers under the Company's qualification system, 85 persons in total

**8. Value of the assets to be contributed upon exercise of the New Share Acquisition Rights**

The value of the assets to be contributed upon exercise of the new share acquisition rights shall be determined by multiplying the price paid per share issuable upon the exercise of the new share acquisition rights (hereinafter "Exercise Price") by the number of shares per new share acquisition right, which is established in item 3.above.

The Exercise Price shall be JPY 2,415. However, if the Exercise Price as so computed would be less than the closing price for transactions in the Company's

common shares on the Tokyo Stock Exchange on July 31, 2007, on which the new share acquisition rights are allocated (or the closing price on the day immediately preceding such date, if there were no transactions on such date), the Exercise Price shall be such closing price.

When the Company issues new shares at a price below the market price following the issuance of new share acquisition rights, the Exercise Price shall be adjusted using the following formula, rounding up fractions of less than ¥1 resulting from the adjustment. However, this shall not apply to the issuance of new shares by the Company in cases of the exercise of new share acquisition rights or public offerings at fair value.

$$\begin{aligned} \text{Post-adjustment Exercise Price} = & \frac{\text{number of shares newly issued} \times \text{pre-adjustment Exercise Price}}{\text{share price before new issuance}} \\ & + \frac{\text{number of shares already issued} \times \text{pre-adjustment Exercise Price}}{\text{number of shares already issued} + \text{increase in number of shares resulting from new issuance}} \end{aligned}$$

Moreover, if the Company implements a stock split or a reverse split following the issuance of new share acquisition rights, the Exercise Price shall be adjusted in proportion to the ratio of the stock split or reverse split, rounding up fractions of less than ¥1 resulting from the adjustment.

In addition to the above, if an adjustment of the Exercise Price is necessary, for example if the Company merges with another company, or merges or absorbs by spin-off another company following the issuance of new share acquisition rights, it shall be appropriately adjusted within reasonable limits.
